

Punch Press Controls Overview

Resolver Based “PressCommander” Punch Press Control “High Speed” For press speed range above 500 Strokes Per Minute (SPM)

Exceeds OSHA 1910.217 & ANSI B11.1-2009, “Control Reliable Design,” with dual logic power supplies, heavy duty resolver, System diagnostics and programming in plain English/Spanish which can control up to four sets of operator stations, Major faults such as E-Stop, motion, brake monitor, and sensor faults are handled by two force-guided relays (Form B safety relays), Off--inch--single--continuous, Continuous ARM; top stop, anti-tie down and anti-repeat, SPM Range (500 and above), Password and supervisory controlled keyed selector switch for security of data entry, Interrupted stroke provision with indicator, Inch mode monitoring, Crank angle and speed readout (SPM), Time-based brake monitor, Built-in motion detector and drift fault, 90° and 270° stop time tester/meter built-in, Built-in hour meter for maintenance, Built-in variable speed compensation, Servo-feed interface built-in, Six optically isolated die protection inputs, Six PLS (programmable limit switch) output relays, 100 job memory, Stroke, batch, quality, and part counters, Batch counter output relay, Die protection output relay, Speed output relay and Auxiliary output relay.

Optional: Ethernet or DeviceNet and PC Link to allow offline job creation and storage.

Optional: 10.1” color touchscreen replaces the standard display shown. (Includes Production Monitoring to create OEE.)

Optional: Expander Board (52-279) - Increases the die protection to 12 stations and the programmable limit switches (PLS) to twelve.

| Part Number | Description (Resolver and resolver cable are included with all models). |
|---------------|---|
| PCS-05-OPTO | High Speed PressCommander (Boards Only) Clutch/Brake System with remote standard display |
| PCS-08-OPTO | High Speed PressCommander (Boards Only) Clutch/Brake System with remote status standard display, IEC switches, push buttons and legend plates |
| PCS-10-OPTO | High Speed PressCommander mounted on panel backplate with remote standard display |
| PCS-20-OPTO | High Speed PressCommander mounted on panel backplate with remote standard display, IEC switches and push buttons |
| PCS-2000-OPTO | High Speed PressCommander NEMA12 (IP64) control panel with IEC Components |
| PCS-4000-OPTO | High Speed PressCommander NEMA12 (IP64) control panel & IEC components |

Model #PCS-4000-OPTO control panel includes the following components:

- No. 303A Dual Solenoid Valve with Muffler
- No. 306 Heavy duty pressure switch
- 52-227 Heavy duty brushless Resolver transducer (formerly 40-003)
- No. 311 Filter, regulator, lubricator
- No. UL-501 operator station

Important Ordering Information for the PCS OPTO: The Programmable relay outputs (PLS1- 6) are normally a mechanical (dry contact) relay with 5A contacts. The PCS-OPTO replaces the PLS1-6 with Solid-State relays. The customer has the choice of replaceable Solid-State outputs PN# 37-045 3.0A @ 24VDC only, OR PN# 37-047 0.5A @ 120VAC/DC. The customer must specify which type of output at the time of order. (no difference in cost)

***Optional:** 10.1” color touchscreen replaces the standard display and is available for all models listed above.

Note -- IEC switchgear supplied standard (NEMA optional). Adder to replace standard IEC switchgear with NEMA switchgear.

PressCommander Options - Resolver Based

Utilizes the Standard Display

Additional Die Protection Inputs and PLS (programmable limit switch outputs)

Expander Board #52-279 adds additional 6 Die inputs and 6 Dry relay contact outputs (At time of order) - Increases the PressCommander die protection from six (6) to twelve (12) station die protection. Also increases the PressCommander programmable limit switch capacity from six (6) to twelve (12) programmable limit switches with mechanical relay (dry) outputs.

Expander power supply board #52-280 (At time of order) - Power Supply Board that stacks under the PressCommander Expander Board (52-279) and is required to power the Expander Board functions.
Request Both Part Numbers (52-279 and 52-280) at time of order if expansion is desired.

Main Power Disconnects

Fused main power Disconnect (IEC or NEMA)

Refer to *Component* section of this catalog for voltage, sizing and part numbers for starters and main power disconnects.

Magnetic Motor Starters

Magnetic Motor Starters are available in IEC or NEMA design formats

Fwd/Rev switchgear with Motor start/stop pushbuttons and legend plates included with Reversing Starter purchase.

Motor start/stop pushbutton and legend plate included with Non-Reversing Starter purchase.

Refer to Component section of this catalog for voltage, sizing and part numbers of the appropriate size starter.

Remote Master Control Station (Free standing operator control station) PressCommander Standard Display Extender System.

Moves all the switchgear and the standard display unit into a separate 12" x 14" x 8" box that can be placed closer to the operator. The control boards, optional starter(s), optional disconnect remain in a separate Control panel whose size is dictated by the size of the starter(s) & disconnect.

NOTE: Cables are available in 15', 25', 35', and 50' lengths. These cables should never be cut between the Remote Master Control Station and Control panel. 15' cable is supplied standard for the Standard Display remote mater control station.

Extension Cables for Remote Master Control Stations located over 15' (4.5m) with Standard Display from control panel.

Part# 53-456 is a 25' Remote Standard Display Extender System (when the Standard Display unit is located 25' from the PressCommander Board Stack)

Part# 53-457 is a 35' Remote Standard Display Extender System (when the Standard Display unit is located 35' from the PressCommander Board Stack)

Part# 53-458 is a 50' Remote Standard Display Extender System (when the Standard Display unit is located 50' from the PressCommander Board Stack)

Part #35-111 Ethernet option for the PressCommander Standard Display

PressCommander Options - Resolver Based

Micro-Inching Function (includes key switch on/off)
Light Guard on/off supervisory controlled key switch (up to four curtains)
Multiple operator station control key switch
Bar Turnover Function (includes key switch on/off)
Die Block receptacle outlet
Shutdown timer (software based)
110VAC outlet or 220 VAC outlet (specify load)
NEMA style indicators & switchgear on control panel to replace IEC style supplied standard

SHUT HEIGHT INDICATOR:

Provides the capability to read the shut height to within .001 inch and will display the position of the slide. Each tool/die setting is saved under the job number. Shut Height Monitoring requires a shut height interface board (Part# 52-298) and a linear sensor for slide position measurement.

Choose a length below: A magnet and two mounting brackets are supplied standard with all linear sensors.

Size

4" - Part# 40-009
8" - Part# 40-010
12" - Part# 40-011
16" - Part# 40-012
24" - Part# 40-013

AUTOMATIC EXTERNAL TRIP:

PCS-10 without IEC switchgear (at time of purchase)
PCS-20 with IEC switchgear (key switches & push buttons)

30-012 24vdc @ 2.2A power supply (90-260vac In) 3.9" L x 3.8" W x 1.4" H (99.1mm x 96.5mm x 35.6mm)
for powering sensors or other auxiliary devices

CONTINUOUS ON DEMAND:

PCS-10 without IEC switchgear (at time of purchase)
PCS-20 with IEC switchgear (key switches & push buttons)

Custom Software Programming (one time fee).

REMOTE MONITORING: (internet based)

Ethernet 100baseT with built in Web page Server (with downtime monitor and logging)
Wireless Ethernet (Wi-Fi) Bridge - Part # 39-154

GUARDING:

Safety Light Curtain (up to four sets of pylons, specify size) (Visit www.pinnaclesystems.com for models available)

HYDRAULIC OVERLOAD:

Press will stop when output opens, then allows the press to be moved in the inch mode with the input still open.

CUSTOMIZED SOFTWARE PROGRAMMING:

Software can be upgraded in the field with a laptop computer.

Options continued on next page.

PressCommander Options - Resolver Based

CLUTCH-BRAKE TIME DELAY HUB OPTION:

Provides the press control with a separate relay for the CLUTCH and a separate relay for the BRAKE to allow for a time delay between each, and to be control reliable.

Consists of the following:

- 1 - Safety HUB (Part# 53-448) running the Clutch-Brake program
- 1 - 24VDC Power Supply (Part# 30-012)
- 2 - Safety Relays for HUB channel D (Part # 52-278)

PEAK TONNAGE MONITORING: (add suffix T1,T2,T3,or T4 to Presscommander Model#)

T1 - One channel monitoring with strain sensor and cable

T2 - Two channel monitoring with strain sensor and cable

T3 - Three channel monitoring with strain sensor and cable

T4 - Four channel monitoring with strain sensor and cable

SIGNATURE TONNAGE ANALYSIS MONITORING (Requires 10.1" Touchscreen - Part # 39-151)

Add suffix: T1-S, T2-S, T3-S, T4-S to the PressCommander Model.

T1-S - One channel monitoring with strain sensor and cable

T2-S - Two channel monitoring with strain sensor and cable

T3-S - Three channel monitoring with strain sensor and cable

T4-S - Four channel monitoring with strain sensor and cable

Part# 39-151

10.1" color touchscreen replaces the Standard PressCommander four line vacuum fluorescent display mounted onto NEMA 12 (IP 64) control panel. Includes Production Monitoring to create OEE.

Remote Master Control Station with 10.1" color touchscreen

Moves all the switchgear and the touchscreen until into a separate 12" x 14" x 8" box that can be placed closer to the operator. The control boards, optional starter(s), optional disconnect remain in a separate control panel whose size is dictated by the size of the starter(s) and disconnect. This requires the Ethernet option to be installed on the Touchscreen.

Part# 43-027 (Required)

Ethernet cable to connect the Remote Master Control 10.1" color touchscreen to the control panel that contains the control boards, optional starters and disconnects. Specify length needed in feet.

Actual Size of PressCommander Touchscreen

Operator Screen

The Operator Screen displays the pertinent press information for the job that is running on the press. Also shown is the Production/Downtime section, which updates automatically in real time the production and downtime status of the press. This management tool is calculated automatically and produces the OEE (Overall Equipment Effectiveness) of the press. Excellent information for the press operator and front line supervisor which is calculated on the production floor "at the machine" and easily transmitted to the production office where the information is stored and data is shared globally by all team members, if desired by the management team.

PRODUCTION/DOWNTIME MONITORING DEFINITIONS:

| | |
|---------------------|---|
| Run Time | Actual time spent making parts. |
| Downtime | Actual time spent on Operator Downtime (i.e. Reason Code) or Press Fault Code (i.e. Brake Fault, Die Fault). |
| Standby Time | Idle Time (i.e. breaks, lunch) or Operator did not specify Reason Code. |
| Good PR | Actual Part Rate (defined as Parts/Hour that are good). |
| PPT | (user entry) Planned Production Time - This is the standard maximum amount of time (in minutes) the machine should operate each Shift (subtracting breaks, lunch, etc.) |
| MPR | (user entry) Maximum Production Rate - This is the Maximum Part Rate (in Parts per Minute) that you would expect based on normal operation (this takes into account aging equipment, tools and substandard material). |
| Avail | (Availability %) - Actual Operating time / SPT (defined as what percentage of available time does the Press make parts). |
| Perf | (Performance %) - Actual Parts / Actual Operating time / MPR (defined as what percentage of parts did you make compared to the Maximum parts you could make). |
| OEE | Overall Equipment Effectiveness = Availability x Performance x Quality |

Note: All of these values also appear in the log file as well. You can also change the DRIVE location of the LOG files (i.e. Remote Hard Drive Server) which provides access to the LOG files even when the Press is OFF.

TOUCHSCREEN DOWNTIME & PRODUCTION MONITORING FOR OVERALL EQUIPMENT EFFECTIVENESS (OEE).

Requires Touchscreen Part# 39-151

20 Downtime Codes - Downtime codes are user programmable and customized to need. Downtime codes can be activated either by manually touching the appropriate touchscreen button **OR** Automatically via the machine circuit signal that caused the machine to stop. This capability provides an exceptional granular fault cause for machine operational analysis.

If machine induced automatic signalling is desired to activate a specific downtime code (such as die protection, tonnage monitoring, shortfeed, misfeed etc.) One of the following input/output interface boards are required.

| | |
|-------------------------|--|
| Part# 52-320 | Provides the capability for six (6) downtime codes to be activated automatically by existing machine control electrics. |
| Part# 52-321 | Provides the capability for sixteen (16) downtime codes to be activated automatically by existing machine control electrics. |
| Part# 52-320 and 52-321 | Also include six (6) dry contact relays that can be used to signal stack lights, alarms etc. Relay Ratings: 5A @ 250 VAC • 5A @ 30 VDC • Coil: 12 VDC |

During operation the user can add and edit 24 Reason Codes (up to 30 characters in length). The reasons are stored on the users computer in a log file. System is capable of manual or automatic machine input of downtime reason(s). Downtime codes can be recorded automatically into Excel spreadsheets, Pareto charts or Pivot tables.

Production / Downtime Monitoring Features, Benefits & Implementation

The Pressroom Electronics Production & Downtime Monitoring System (PDMS) represents an invaluable shop floor control and management tool. Through diligent use of the system, the management team can achieve significant gains to the overall operating performance of the plant. Indices related to Productivity, Throughput, Rework, Order Fulfillment, and Quality are common areas of impact.

Typically, there are four (4) phases to the implementation of the system:

- **Understanding the Mechanics:** As with anything new, the users will go through a short period of time to understand the inputs to and the resultant outputs from the system.
- **Interpretation of the Data:** The supervisors and management team acquire a unified understanding of the data and the indices of performance from the reporting elements of the system.
- **Use of the Data:** The supervisors and management team begin to use the data to manage the day to day operations and to improve the performance of the plant.
- **Continuous Improvement (CI):** The system is used as a key component to establish budgets, long term plans relative to capacity constraints and for CI projects.

Production / Downtime Monitoring Features, Benefits & Implementation Cont.

As a value added service, Pressroom Electronics offers on-site consultants who provide assistance in augmenting and accelerating the rate of implementation of the Production & Downtime Monitoring System. Among the services offered:

- **Shop Floor Coaching:** Time spent directly with the Supervisor/ Manager coaching them on the mechanics and use of the System as well as the indices of performance. This process accelerates the individual(s) understanding of the system and ensures a unified understanding of the data and indices of performance among the management team.
- **Engineered Standards:** This involves the establishment of Engineered Standards which are a key component to the integrity and effective use of the data and indices derived from the system.
- **Facilitate Daily Review Meetings (DRM):** Establish the timing, attendance and agenda for this important daily review meeting. Involves the facilitation of the meetings based on the data and downtime reported from the system and the training of the chairperson for perpetuity. This enables the ongoing and effective execution of these important daily corrective action meetings.
- **Performance Measurement Reporting:** Involves the custom design of the Daily Operating Report and the Weekly Management Report, including performance trend graphs. Targets the Key Performance Indicators (KPI) and other pertinent data that can be derived from the system. This enables timely, accurate and meaningful performance reporting.

Touchscreen Cutout Pattern

Punch Press Controls Overview

Resolver Based "PressCommander" Punch Press Control

For press speed range 1-500 Strokes Per Minute (SPM)

Exceeds OSHA 1910.217 & ANSI B11.1-2009, "Control Reliable Design," with dual logic power supplies, heavy duty resolver, System diagnostics and programming in plain English/Spanish which can control up to four sets of operator stations, Major faults such as E-Stop, motion, brake monitor, and sensor faults are handled by two force-guided relays (Form B safety relays), Off--inch--single--continuous, Continuous ARM; top stop, anti-tie down and anti-repeat, SPM Range (1 to 500), Password and supervisory controlled keyed selector switch for security of data entry, Interrupted stroke provision with indicator, Inch mode monitoring, Crank angle and speed readout (SPM), Time-based brake monitor, Built-in motion detector and drift fault, 90° and 270° stop time tester/meter built-in, Built-in hour meter for maintenance, Built-in variable speed compensation, Servo-feed interface built-in, Six optically isolated die protection inputs, Six PLS (programmable limit switch) output relays, 100 job memory, Stroke, batch, quality, and part counters, Batch counter output relay, Die protection output relay, Speed output relay and Auxiliary output relay.

Optional: Ethernet or DeviceNet and PC Link to allow offline job creation and storage.

Optional: 10.1" color touchscreen replaces the standard display shown. (Includes Production Monitoring to create OEE.)

Optional: Expander Board (52-279) - Increases the die protection to 12 stations and the programmable limit switches (PLS) to twelve.

It is based on a standard PCS-2000 which comes in a 20" x 20" x 8" box (going up in size depending on options). The SFP does not come with the step-down transformer and is not for customers who require additional options (i.e. Starter(s) , Disconnect, etc.). The SFP is for customers who already have a Panel for high voltage/high current equipment, and want the Controls to be closer to the operator.</p> <p>NOTE: There is no cable length limitation between the SFP and the high voltage equipment.</p> |
| PCS-4000 | <p>PressCommander NEMA12 (IP64) control panel & IEC components</p> <p>Model #PCS-4000 control panel includes the following components:</p> <ul style="list-style-type: none"> No. 303A Dual Solenoid Valve with Muffler No. 306 Heavy duty pressure switch 52-227 Heavy duty brushless Resolver transducer (formerly 40-003) No. 311 Filter, regulator, lubricator No. UL-501 operator station |

***Optional:** 10.1" color touchscreen replaces the standard display and is available for all models listed above.

Note -- IEC switchgear supplied standard (NEMA optional). Adder to replace standard IEC switchgear with NEMA switchgear.

Punch Press Controls Overview

Resolver Based “PressCommander” Punch Press Control “High Speed” For press speed range above 500 Strokes Per Minute (SPM)

Exceeds OSHA 1910.217 & ANSI B11.1-2009, “Control Reliable Design,” with dual logic power supplies, heavy duty resolver, System diagnostics and programming in plain English/Spanish which can control up to four sets of operator stations, Major faults such as E-Stop, motion, brake monitor, and sensor faults are handled by two force-guided relays (Form B safety relays), Off--inch--single--continuous, Continuous ARM; top stop, anti-tie down and anti-repeat, SPM Range (500 and above), Password and supervisory controlled keyed selector switch for security of data entry, Interrupted stroke provision with indicator, Inch mode monitoring, Crank angle and speed readout (SPM), Time-based brake monitor, Built-in motion detector and drift fault, 90° and 270° stop time tester/meter built-in, Built-in hour meter for maintenance, Built-in variable speed compensation, Servo-feed interface built-in, Six optically isolated die protection inputs, Six PLS (programmable limit switch) output relays, 100 job memory, Stroke, batch, quality, and part counters, Batch counter output relay, Die protection output relay, Speed output relay and Auxiliary output relay.

Optional: Ethernet or DeviceNet and PC Link to allow offline job creation and storage.

Optional: 10.1” color touchscreen replaces the standard display shown. (Includes Production Monitoring to create OEE.)

Optional: Expander Board (52-279) - Increases the die protection to 12 stations and the programmable limit switches (PLS) to twelve.

| Part Number | Description (Resolver and resolver cable are included with all models). |
|---------------|---|
| PCS-05-OPTO | High Speed PressCommander (Boards Only) Clutch/Brake System with remote standard display |
| PCS-08-OPTO | High Speed PressCommander (Boards Only) Clutch/Brake System with remote status standard display, IEC switches, push buttons and legend plates |
| PCS-10-OPTO | High Speed PressCommander mounted on panel backplate with remote standard display |
| PCS-20-OPTO | High Speed PressCommander mounted on panel backplate with remote standard display, IEC switches and push buttons |
| PCS-2000-OPTO | High Speed PressCommander NEMA12 (IP64) control panel with IEC Components |
| PCS-4000-OPTO | High Speed PressCommander NEMA12 (IP64) control panel & IEC components |

Model #PCS-4000-OPTO control panel includes the following components:

- No. 303A Dual Solenoid Valve with Muffler
- No. 306 Heavy duty pressure switch
- 52-227 Heavy duty brushless Resolver transducer (formerly 40-003)
- No. 311 Filter, regulator, lubricator
- No. UL-501 operator station

Important Ordering Information for the PCS OPTO: The Programmable relay outputs (PLS1- 6) are normally a mechanical (dry contact) relay with 5A contacts. The PCS-OPTO replaces the PLS1-6 with Solid-State relays. The customer has the choice of replaceable Solid-State outputs PN# 37-045 3.0A @ 24VDC only, OR PN# 37-047 0.5A @ 120VAC/DC. The customer must specify which type of output at the time of order. (no difference in cost)

***Optional:** 10.1” color touchscreen replaces the standard display and is available for all models listed above.

Note -- IEC switchgear supplied standard (NEMA optional). Adder to replace standard IEC switchgear with NEMA switchgear.

PressCommander Proposal/Ordering Guide

Resolver Based Controls (All Models/Styles)

Please complete the form on the next two pages and email it to the Pressroom Sales Department at sales@pressroomelectronics.com. You may also fax the form to (412) 262-1197. We also have an electronic version of this form available on our website www.pressroomelectronics.com.

|---------|-----------------|--------------------------|-------------------------------|
| Name | _____ | Email | _____ |
| Company | _____ | Punch Press Manufacturer | _____ |
| Address | _____ | Model # | _____ Serial # _____ |
| City | _____ | Shop # | _____ Press Speed (SPM) _____ |
| State | _____ Zip _____ | Voltage | _____ Cycle _____ Phase _____ |
| Phone | _____ | Fax | _____ |

*All PressCommander Models include clutch/brake and integrated automation control capability, standard display, resolver and 30' (9.1m) of connector ended resolver cable.

PCS-05

*Components as stated above.

PCS-08

*Components plus switches, legend plates, indicators and push buttons.

PCS-10

*Components mounted on a blackplate. Prewired to terminal strip.

PCS-20

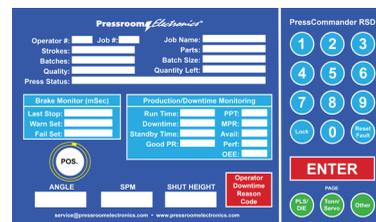

*Components mounted on a backplate and prewired to terminal strip. Includes all switches, legend plates, indicators and push buttons.

PCS-2000

*Components housed in a NEMA 12 (IP64) steel control panel. Prewired to terminal strip.

Optional Touchscreen Display

Replaces standard display in all PCS Models. Part #39-151.

PressCommander Proposal/Ordering Guide

Resolver Based Controls with Standard Display (All Models/Styles)

1 to 500 SPM Press Speed

Qty.

 PCS-05 PCS-08 PCS-10 PCS-20 PCS-2000

Specify Operator Control Location on Control Panel:

 Left End Panel Door Right End

Above 500 SPM Press Speed

Qty.

 PCS-05-OPTO PCS-08-OPTO PCS-10-OPTO PCS-20-OPTO PCS-2000-OPTO

Specify Operator Control Location on Control Panel:

 Left End Panel Door Right End

PCS-2000-SFP PressCommander Small Form Package

The PCS-2000-SFP comes in a 12" x 14" x 8" NEMA 12 Control box and is the same price as a base PCS-2000 unit. It is based on a standard PCS-2000 which comes in a 20" x 20" x 8" box (going up in size depending on options). The SFP does not come with the step-down transformer and is not for customers who require additional options (i.e. Starter(s), Disconnect, etc.). The SFP is for customers who already have a Panel for high voltage/high current equipment, and want the Controls to be closer to the operator.

NOTE: There is no cable length limitation between the SFP and the high voltage equipment control panel.

PCS-4000 (1 to 500 SPM Press Speed)

or PCS-4000-OPTO (Above 500 SPM Press Speed)

Specify Operator Control Location (for either model):

 Left End Panel Door Right End

Fused Main Power Disconnect - Refer to Main Power Disconnect Section

Mounted on control panel _____ AMP

Choose Style: IEC NEMA Part# _____

Main Motor Magnetic Motor Starter - Refer to Main Power Disconnect Section

Choose Style: IEC NEMAChoose: Rev Non-Rev

_____ HP _____ Full Load Amps Part# _____

Includes on/off push buttons and keyed selector switch forward/reverse when applicable.

Ram Adjust Magnetic Motor Starter - Refer to Main Power Disconnect Section

Choose Style: IEC NEMA

_____ HP _____ Full Load Amps Part# _____

Includes up/down push buttons and keyed selector switch forward/reverse when applicable.

Accessory Magnetic Motor Starter - Refer to Main Power Disconnect Section

Choose Style: IEC NEMAChoose: Rev Non-Rev

_____ HP _____ Full Load Amps Part# _____

Includes on/off push buttons and keyed selector switch forward/reverse when applicable.

PressCommander Proposal/Ordering Guide

Resolver Based Controls (For Standard Display models)

Additional Die Protection Inputs and PLS (programmable limit switch outputs) for all models.

- Expander Board #52-279**
Adds additional 6 Die inputs and 6 Dry relay contact outputs (At time of order) - Increases the Press Commander die protection from six (6) to twelve (12) station die protection. Also increases the PressCommander programmable limit switch capacity from six (6) to twelve (12) programmable limit switches with mechanical relay (dry) outputs.

- Expander power supply board #52-280 (At time of order)**
Power Supply Board that stacks under the PressCommander Expander Board (52-279) and is required to power the Expander Board functions.

Request Both Part Numbers (52-279 and 52-280) at time of order if expansion is desired.

For Models that utilize the Standard Display

- Remote Master Control Station**
(Free standing operator control station) PressCommander Standard Display Extender System. Moves all the switchgear and the standard display unit into a separate 12" x 14" x 8" box that can be placed closer to the operator. The control boards, optional starter(s), optional disconnect remain in a separate Control panel whose size is dictated by the size of the starter(s) & disconnect.
NOTE: Cables are available in 15', 25', 35', and 50' lengths. These cables should never be cut between the Remote Master Control Station and Control panel. 15' cable is supplied standard for the Standard Display remote mater control station.

- Extension Cables for Remote Master Control Stations located over 15' (4.5m) with Standard Display from control panel.**

- Part# 53-456 is a 25' Remote Standard Display Extender System
(when the Standard Display unit is located 25' from the PressCommander Board Stack)
- Part# 53-457 is a 35' Remote Standard Display Extender System
(when the Standard Display unit is located 35' from the PressCommander Board Stack)
- Part# 53-458 is a 50' Remote Standard Display Extender System
(when the Standard Display unit is located 50' from the PressCommander Board Stack)

- Part #35-111 Ethernet option for the PressCommander Standard Display**

PressCommander Proposal/Ordering Guide

Resolver Based Controls (For Touchscreen Display models)

- Part# 39-151**
10.1" color touchscreen replaces the Standard PressCommander four line vacuum florescent display. Available for all PressCommander models. Includes Downtime and Production Monitoring System.

- Remote Master Control Station with 10.1" color touchscreen**
Moves all the switchgear and the touchscreen until into a separate 12" x 14" x 8" box that can be placed closer to the operator. The control boards, optional starter(s), optional disconnect remain in a separate control panel whose size is dictated by the size of the starter(s) and disconnect. This requires the Ethernet option to be installed on the Touchscreen.

- Part# 43-027 (Required)**
Ethernet cable to connect the Remote Master Control 10.1" color touchscreen to the control panel that contains the control boards, optional starters and disconnects.
Specify length needed in feet. _____

Touchscreen Downtime and Production Monitoring for Overall Equipment Effectiveness (OEE).

- Requires Touchscreen Part# 39-151**
20 Downtime Codes - Downtime codes are user programmable and customized to need. Downtime codes can be activated either by touching the appropriate touchscreen button **OR** Automatically via the machine circuit signal that induced the machine to stop. This capability provides an exceptional granular fault cause for machine operational analysis.
Production Monitoring is supplied standard with the Touchscreen.

If machine induced automatic signalling is desired to activate a specific downtime code (such as die protection, tonnage monitoring, shortfeed, misfeed etc.) One of the following input/output interface boards are required.

- Part# 52-320**
Provides the capability for six (6) downtime codes to be activated automatically by existing machine control electrics.
- Part# 52-321**
Provides the capability for sixteen (16) downtime codes to be activated automatically by existing machine control electrics.

*Note - Part# 52-320 and 52-321
Includes six (6) dry contact relays that can be used to signal stack lights, alarms etc.
Relay Ratings: 5A @ 250 VAC • 5A @ 30 VDC • Coil: 12 VDC

Additional Die Protection Inputs and PLS (programmable limit switch outputs) for all models.

- Expander Board #52-279**
Adds additional 6 Die inputs and 6 Dry relay contact outputs (At time of order) - Increases the Press Commander die protection from six (6) to twelve (12) station die protection. Also increases the PressCommander programmable limit switch capacity from six (6) to twelve (12) programmable limit switches with mechanical relay (dry) outputs.

- Expander power supply board #52-280 (At time of order)**
Power Supply Board that stacks under the PressCommander Expander Board (52-279) and is required to power the Expander Board functions.

Request Both Part Numbers (52-279 and 52-280) at time of order if expansion is desired.
